

The cost of magic

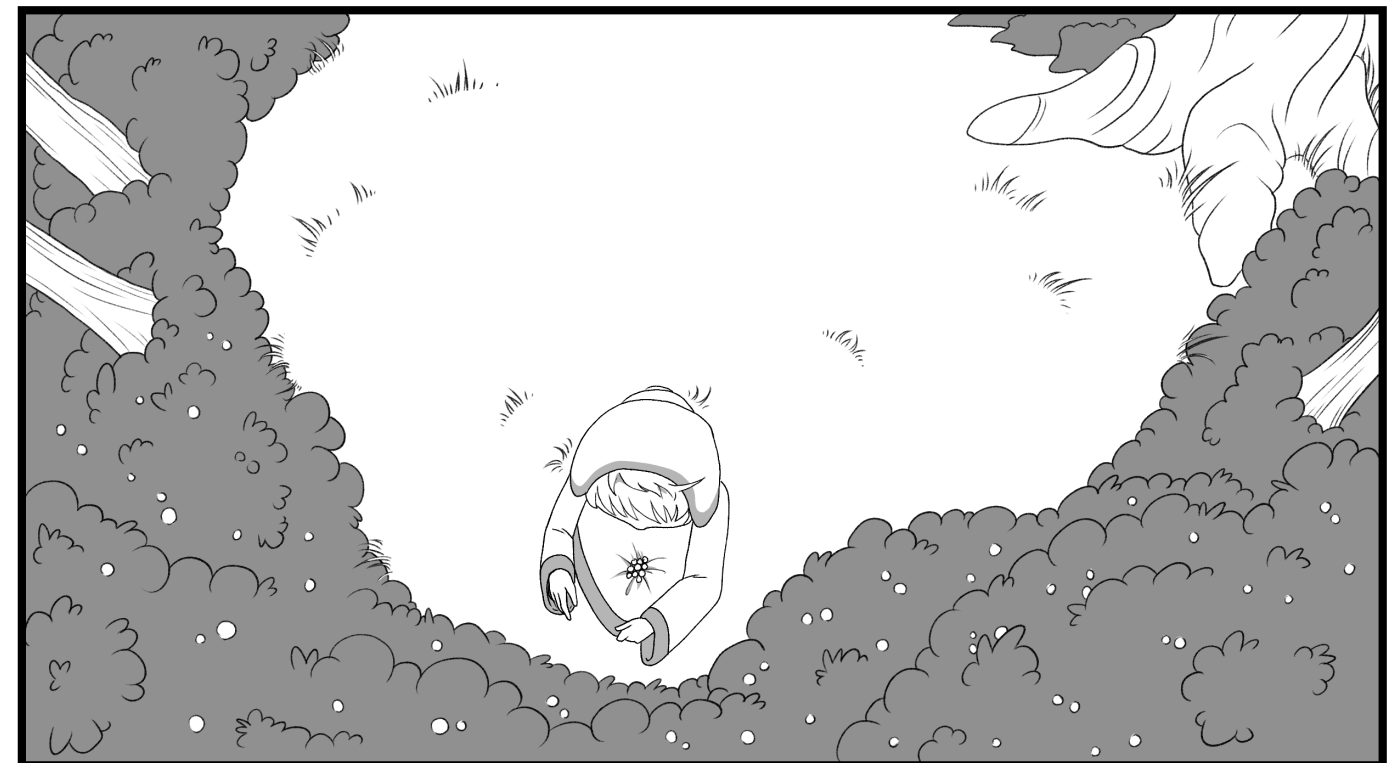

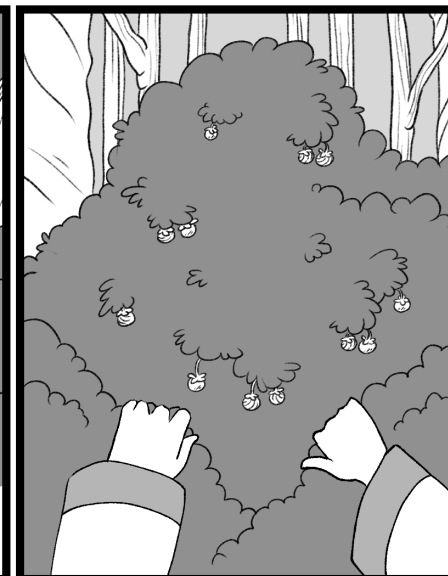

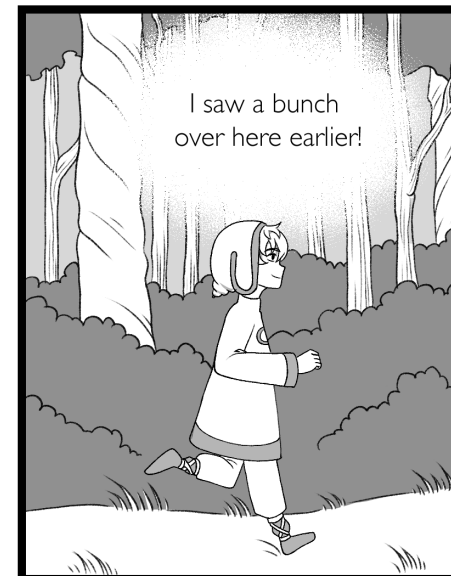

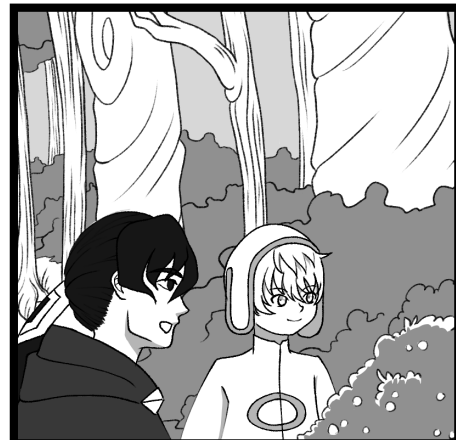

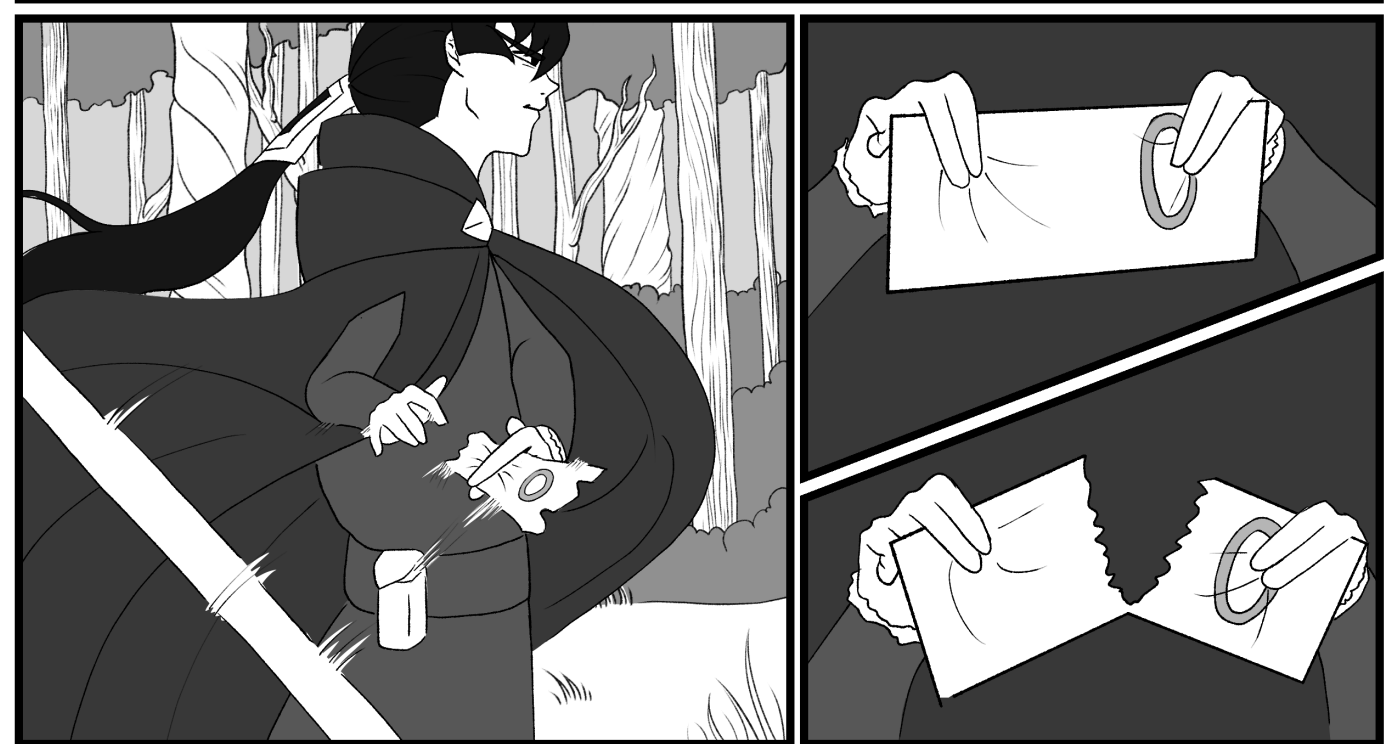

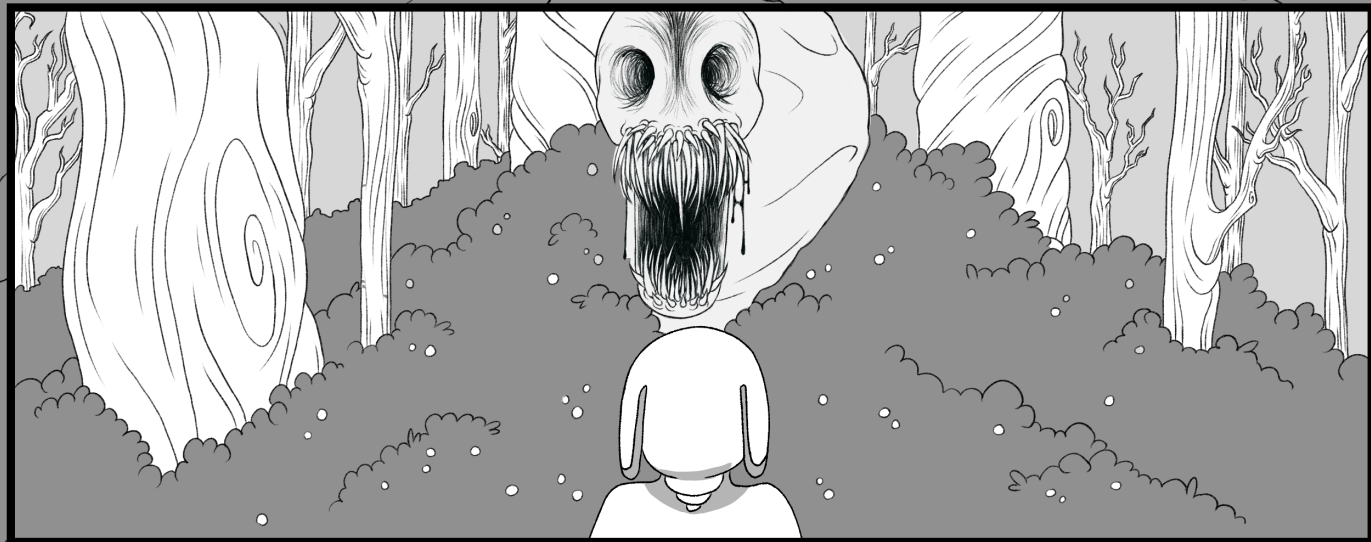

In the beginning,
humanity received the gift of magic,
but there was a condition.

Magic would remain in the world as long,
as humanity could keep it there.
Thus, Cycles of horror
became common place in humanities history.

When the sun darkens,
monsters will return snuffing
out all the magic they can find.
To hunt down and kill
who ever possesses the gift,
monsters have the ability
to sense magic when it is used.

The only place safe during
this time is Sanctuary –
a ancient tree that the monsters
do not approach.
Here Humanity can survive
to pass on the gift
to another generation.

Is everything ok?!

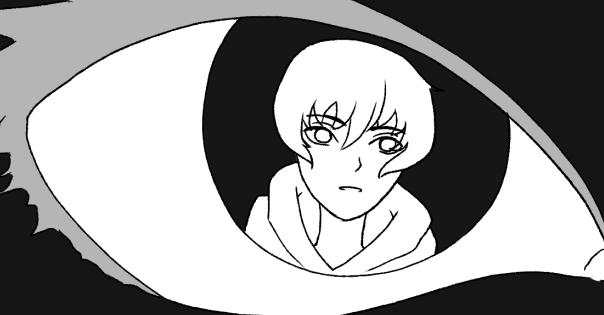

Your hands!

Thank heaven.

I'm ok.
It's just
berry juice.

See.

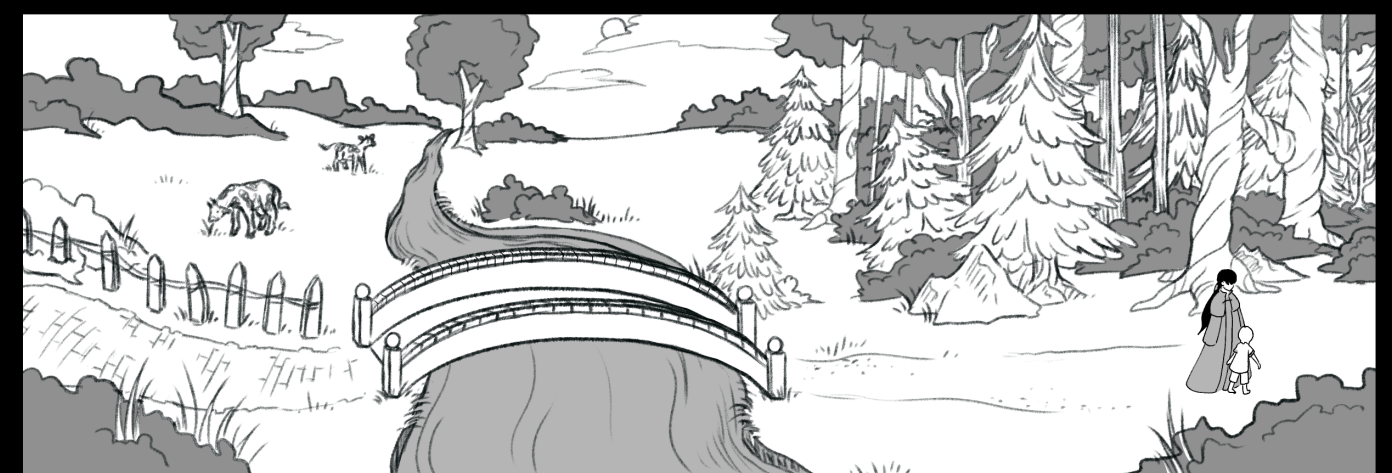

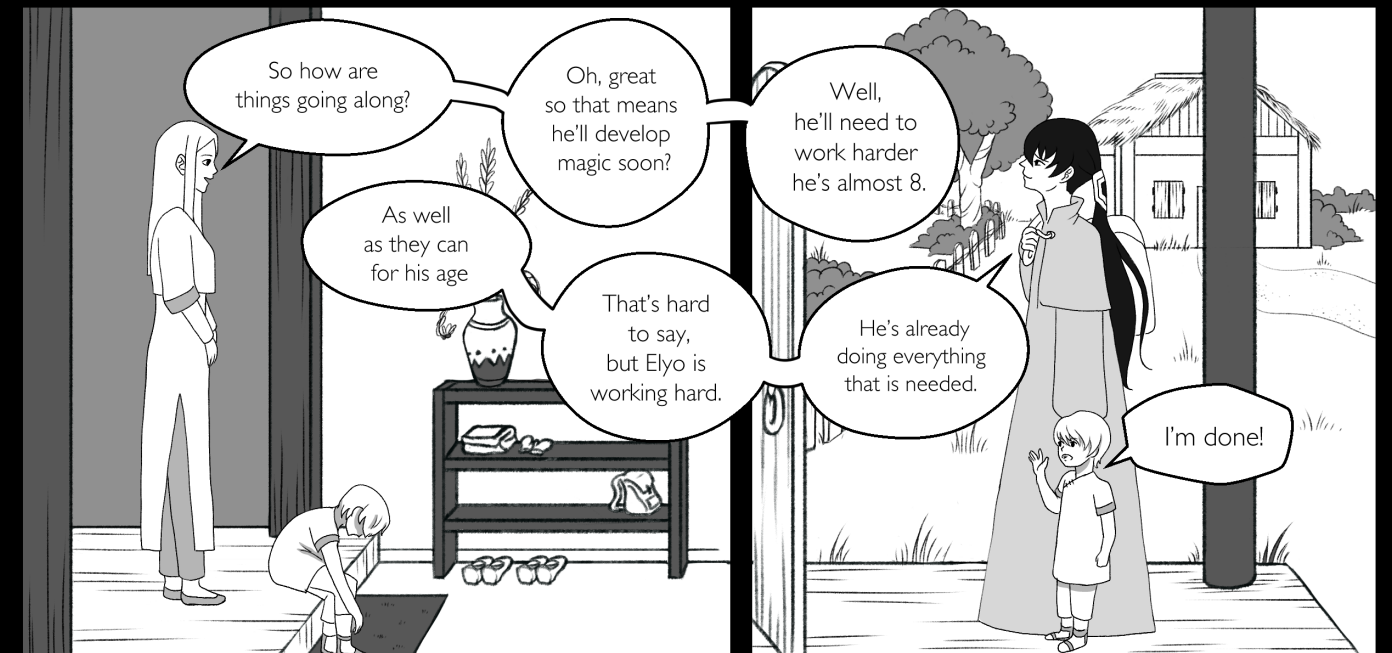

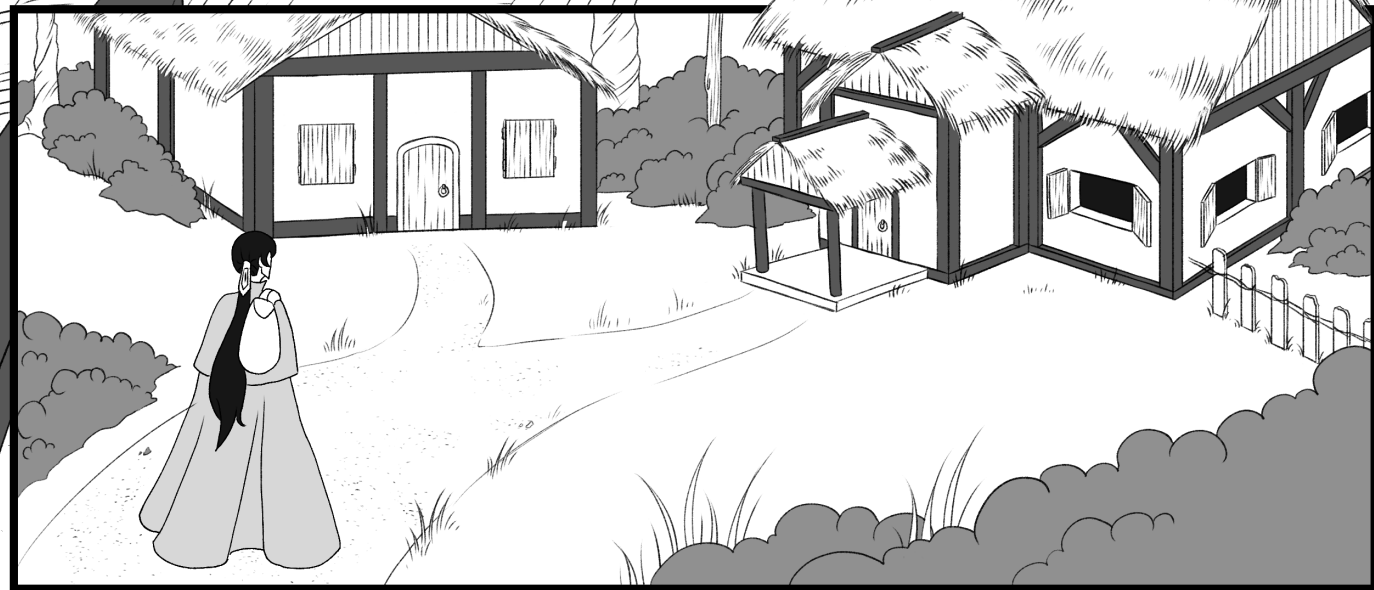

Don't scare
me like
that again!

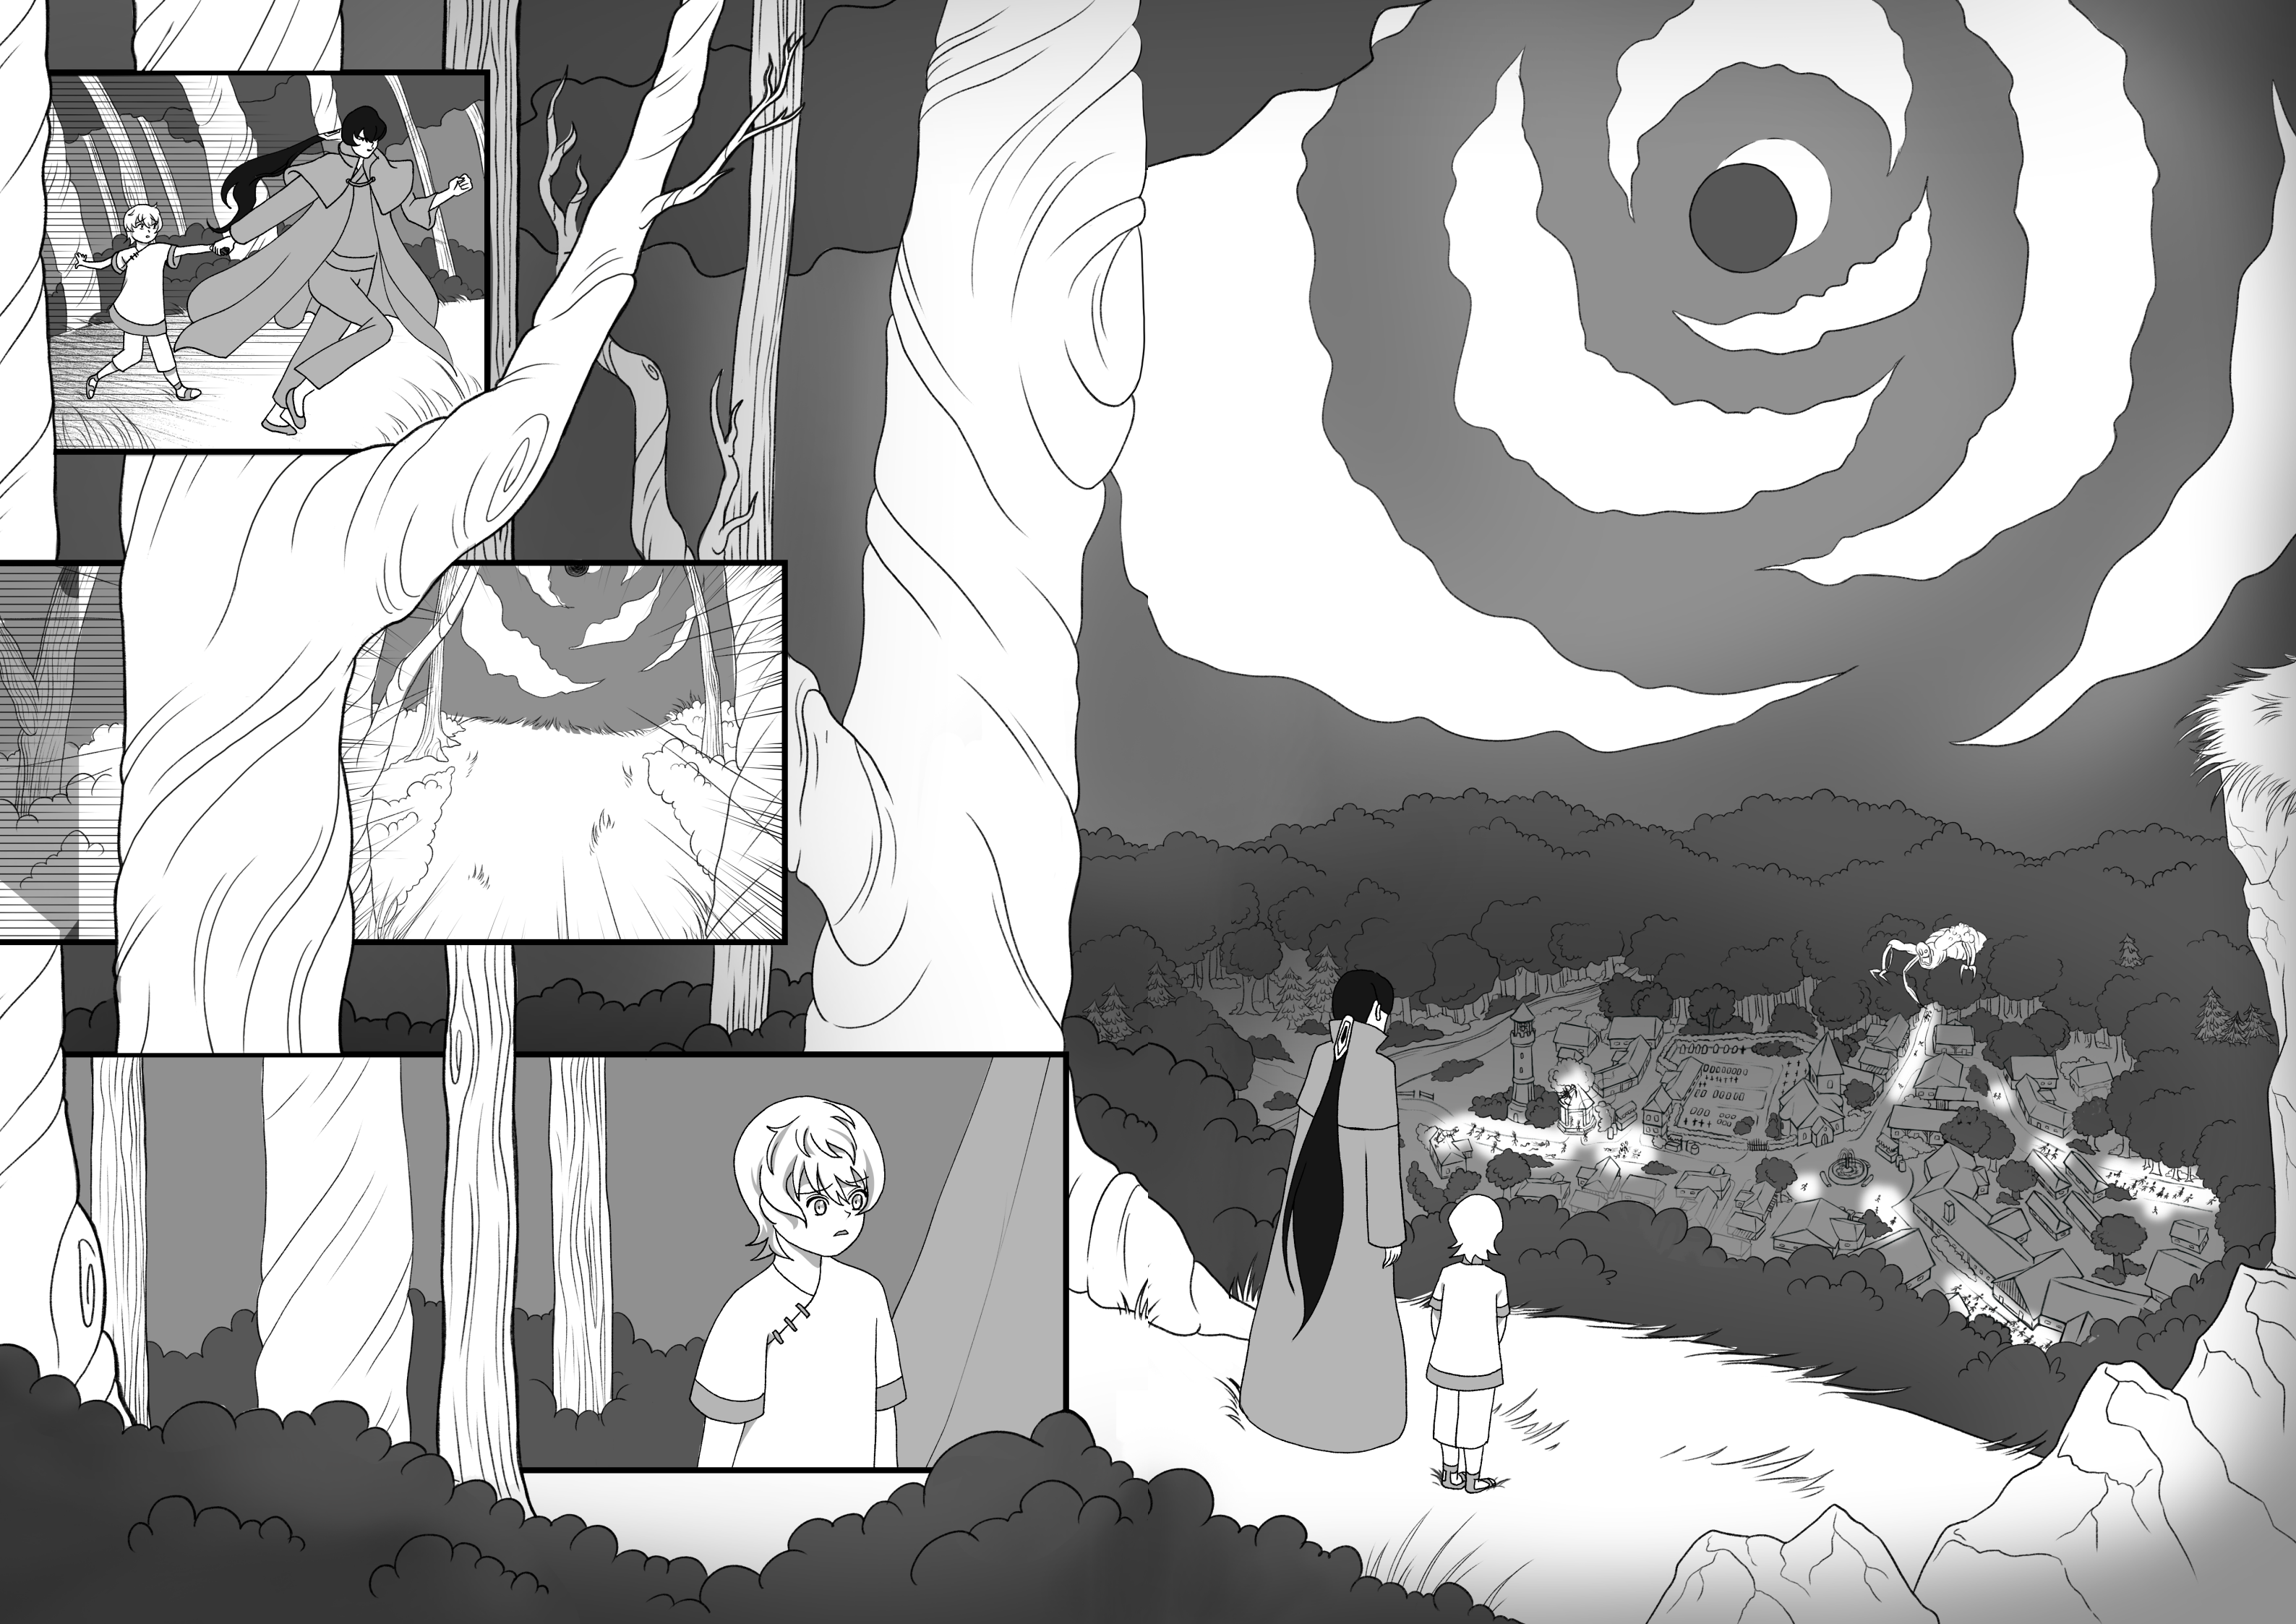

Interesting...

Don't run away
like that again,
got it.

The cost of Magic

For centuries, humanity has struggled against cycles of destruction and horror to keep the gift of magic alive. Unexpectedly, a young wizard and a child are caught up in the terrors of this curse and must fight for their survival.
